

ONTARIO PROVINCIAL STANDARD SPECIFICATION

METRIC OPSS.PROV 1102 APRIL 2017 (FORMERLY OPSS 1102, NOVEMBER 2007)

Note: The PROV implemented in April 2017 replaces OPSS 1102 COMMON, November 2007 with no technical content changes.

# MATERIAL SPECIFICATION FOR LIQUID ASPHALT USED IN SPRAYING, SEALING, AND PRIMING APPLICATIONS

# TABLE OF CONTENTS

- 1102.01 SCOPE
- 1102.02 REFERENCES
- 1102.03 DEFINITIONS
- 1102.04 DESIGN AND SUBMISSION REQUIREMENTS Not Used
- 1102.05 MATERIALS
- 1102.06 EQUIPMENT Not Used
- 1102.07 PRODUCTION Not Used
- 1102.08 QUALITY ASSURANCE
- 1102.09 OWNER PURCHASE OF MATERIAL
- APPENDICES Not Used

## 1102.01 SCOPE

This specification covers the requirements for different types and grades of liquid asphalt for use in highway construction and maintenance.

#### 1102.01.01 Specification Significance and Use

This specification has been developed for use in provincial oriented Contracts. The administration, testing, and payment policies, procedures, and practices reflected in this specification correspond to those used by the Ontario Ministry of Transportation.

Use of this specification or any other specification shall be according to the Contract Documents.

# 1102.01.02 Appendices Significance and Use

Appendices are not for use in provincial contracts as they are developed for municipal use, and then, only when invoked by the Owner.

Appendices are developed for the Owner's use only.

Inclusion of an appendix as part of the Contract Documents is solely at the discretion of the Owner. Appendices are not a mandatory part of this specification and only become part of the Contract Documents as the Owner invokes them.

Invoking a particular appendix does not obligate an Owner to use all available appendices. Only invoked appendices form part of the Contract Documents.

The decision to use any appendix is determined by an Owner after considering their contract requirements and their administrative, payment, and testing procedures, policies, and practices. Depending on these considerations, an Owner may not wish to invoke some or any of the available appendices.

# 1102.02 REFERENCES

When the Contract Documents indicate that provincial-oriented specifications are to be used and there is a provincial-oriented specification of the same number as those listed below, references within this specification to an OPSS shall be deemed to mean OPSS.PROV, unless use of a municipal-oriented specification is specified in the Contract Documents. When there is not a corresponding provincial-oriented specification, the references below shall be considered to be to the OPSS listed, unless use of a municipal-oriented specification is specified in the Contract Documents.

This specification refers to the following standards, specifications, or publications:

## Ministry of Transportation Publications

y Testing Manual:
Penetration of Bituminous Materials
Flash Point by Cleveland Open Cup
Kinematic Viscosity of Asphalt
Solubility of Bituminous Materials
Ductility of Bituminous Materials

## **ASTM International**

D 36-95 (2000) e1	Softening Point of Bitumen (Ring-and-Ball Apparatus)
D 140-01(2007)	Sampling Bituminous Materials
D 243-02	Residue of Specified Penetration
D 402-02	Distillation of Cut-back Asphaltic (Bituminous) Products
D 3143-98	Flash Point of Cut-back Asphalt with Tag Open-Cup Apparatus

# 1102.03 DEFINITIONS

For the purpose of this specification, the following definitions apply:

Liquid Asphalt means an asphalt cement mixed with volatile materials to increase the flow qualities of the asphalt cement.

# 1102.05 MATERIALS

#### 1102.05.01 General

Liquid asphalt shall be of the type and grade specified in the Contract Documents and shall be supplied from a source approved by the Owner.

Under no circumstances shall the source of supply or the product be changed or partial or total supply allocated to another supplier without the prior approval of the Owner.

#### 1102.05.02 Physical Requirements

Liquid asphalt shall be according to Tables 1, 2, 3, and 4.

#### 1102.05.03 Shipment

The material shall be shipped in clean containers. Containers which are being reused shall be inspected, and cleaned, if required, prior to loading to ensure there is no contamination.

When shipment is by tank truck or railway tank car, the material shall arrive at the destination at a temperature at least 5 °C higher than the minimum spraying/mixing temperature specified in Table 5 and not more than the maximum temperature specified in Table 5.

## 1102.08 QUALITY ASSURANCE

#### 1102.08.01 Compliance

Liquid asphalt shall be according to Tables 1, 2, 3, and 4 for the particular grade and type when tested according to the test methods designated in the tables.

#### 1102.08.02 Inspection

The Owner may inspect shipping containers for cleanliness at any time.

#### 1102.08.03 Sampling

Representative samples of material being supplied shall be taken, if specified in the Contract Documents, according to ASTM D 140 from either the supplier's plant or any shipment in the presence of the Contract Administrator. Samples taken prior to delivery shall be at no extra cost to the Owner.

#### 1102.08.04 Testing

Samples may be tested by the Owner according to the tests listed in material requirements tables.

#### 1102.08.05 Rejection

Failure of any sample to conform to any of the material requirements shall be cause for rejection of the material. Rejected materials shall be replaced at no extra cost to the Owner.

#### 1102.09 OWNER PURCHASE OF MATERIAL

Liquid asphalt shall be measured by mass in tonnes as specified in the purchasing order. The tare of the hauling vehicle shall be determined for each load.

Payment at the price specified in the purchasing order shall be for the supply of the liquid asphalt delivered to the destination on the date and time specified.

The cost of all testing, except that performed in the Owner's laboratory, shall be included in the price.
